Two lion hunters were behind a big tree. 'That's the fastest lion in the forest and the most difficult to catch. I'm going to catch it with this net,' said one of the hunters. The hunters tied the net to the tree and left.

Leo was very tired. He walked to the big tree to rest. Leo didn't see the hunters' net. He got caught in it. 'Help! Help!' he shouted. Tiny heard Leo shouting and ran to help.

Tiny saw Leo in the net. 'I'm small, but I can help you. I'm very good at climbing.' Tiny climbed to the top of the net and cut the rope with his teeth. Leo was free. 'Thank you,' Leo said, and the two best friends walked into the forest together.

Then new teeth grow. They are strong and we keep them for the rest of our lives. That's why we should take care of them! Your teeth help you eat. You use them to bite and chew food. Saliva helps you eat too because it makes your food soft and wet.

It also protects your teeth from germs. The pink parts around your teeth are your gums. The enamel on your teeth makes them white and bright. It's the hardest part of your body!

'I know about the Dilong! I did a project about it three years ago. Listen. Take my project. You don't have to do anything. Can we play now?' said Vincent. 'Erm... OK.' said Dylan.

The next day at school, Mr Day asked Dylan to present his project. Dylan didn't know anything about the Dilong. He started talking. Mr Day said 'Dylan, did you do this project yourself?' 'No...' said Dylan. The teacher thought, and then he said 'That's OK, but you have to do another project. You have to do it yourself.' 'I'm sorry...' said Dylan. He felt very bad about his mistake.

Dylan decided to work hard that afternoon. His brother said to him 'I can help you. This way you can finish earlier and we can play! You can use my new controller too!' 'No, thanks.' said Dylan, 'I'm going to do the project myself. It's going to be great!'

Project Skills

BRAINSTORM → PLAN → RESEARCH → CREATE → PROOFREAD → PRESENT

STEP 1
BRAINSTORM

- Think of the topic carefully and create a mind map to help you come up with ideas or words related to the topic.

STEP 2
PLAN

- Decide which of the ideas in Step 1 you would like to include in your project and make a plan to use as a general guide.

STEP 3
RESEARCH

- Do research on the topic. Read books, use the Internet, watch videos or documentaries or even visit a museum.
- Note down key words and important information you have found. Remember: you mustn't copy the information. Use your own words to summarise the ideas.

STEP 4
CREATE

- When you have collected all the information, start working on your project.
- Make your project interesting. Think of a title and find pictures or draw your own.
- You can also write captions underneath the pictures to describe them.

STEP 5
PROOFREAD

- After you finish, proofread your work.
- Make sure you have included all the information and ideas you chose in your project.
- Check your spelling, grammar, vocabulary, etc.

STEP 6
PRESENT

A presentation consists of 3 stages:

Stage 1: Before the presentation

- Practise presenting your work in front of a mirror or to a friend. This will help you feel more confident.

Stage 2: During the presentation

- First, introduce the topic. (I would like to talk about... / I am going to talk about...)
- Use short and simple sentences.
- Speak clearly and confidently.
- Smile at the people in the audience (your classmates) and make eye contact.
